Bug fixed in IB70A:

Web Service version 7.0.0.0

1. Barcode, fixed settings page bin inquiry option, for serial item, Quantity 0 is not showing in bin inquiry issue.
2. Barcode, PJC Material Usage, turn on skip bin entry function, add item quantity with bin

location, can't save document, prompt error message issues fixed.

3. Sage 300, IB Web Service Configuration, test for common issues, after test, message issues fixed.
4. Sage 300, IB Options, OE Extra shipment threshold setup 10%. Barcode, OE Shipment, calculates shipment threshold issues fixed.
5. Barcode, IC Receipt Return, load document having bin location item with lot and serial number, posting failed issues fixed.

App Version 2023 0.0

1. Barcode, MF Kanban and Backflush, after posting, fix will print Issuance report issue.
2. Barcode, Offline A/T Stock Count, select documents with serial item number. Serial item details page, scan serial number, the cursor not auto put in serial number fields issues fixed.
3. Barcode, OE Shipment, load document, item number without bin location, will auto sort by expected ship date. And disable sorting if document without bin location.
4. Barcode, IC Receipt, add lot item number with bin location. Normal mode, lot details page, scan lot number with code-128, the cursor not auto put in quantity fields issues fixed.
